

Bitdefender GravityZone Extended Email Security for MSPs

Perimeter to Inbox: **Email Security Built for MSPs**

The Rising Challenge for MSPs

Email remains the most common entry point for cyberattacks, driving phishing, ransomware, and Business Email Compromise (BEC) that bypass default filters. MSPs face the added challenge of securing diverse client environments while keeping operations simple, efficient, and profitable. The risks are growing, but so are the expectations from customers who rely on their MSP to stop threats before they cause business disruption.

Empowering MSPs to Deliver Next-Level Email Protection

↳ Purpose-built for MSP speed and growth

Efficiency is everything in MSP operations. Extended Email Security was designed from the ground up for MSPs, with:

- ▶ A fast, modern UI and **global rules** to manage all clients at once
- ▶ Proof-of-value **monitor mode** to demonstrate results and win new business
- ▶ **End-user self-service** with on-demand quarantine reports and message release
- ▶ **Straightforward licensing** with 1:1 Microsoft 365 usage-based billing

↳ Flexible deployment in minutes, not days

MSPs need solutions that can adapt to diverse client environments without slowing down onboarding. Bitdefender delivers:

- ▶ **Flexible deployment** via SEG, API, or both
- ▶ **Broad compatibility** across Microsoft 365, on-prem, hybrid environments, and third-party providers
- ▶ **Cloud-native architecture** — no appliances or complex maintenance

↳ Protect against the full spectrum of email-based threats

Email is still the #1 attack vector. Extended Email Security delivers multi-layered defenses that go beyond default filters to block:

- ▶ **Business Email Compromise (BEC)** and impersonation attempts
- ▶ **Zero-day exploits** and advanced malware with sandboxing and AI-powered detection
- ▶ **Insider threat detection** to stop compromised accounts and internal attacks
- ▶ **Spoofed domains** with SPF, DKIM, and DMARC enforcement
- ▶ **Graymail** and bulk messages that clutter inboxes
- ▶ **Outbound scanning** to stop threats that can damage client reputation

Purpose-built for MSP speed and growth

↳ Fast UI Built for MSP Speed **NEW**

Built from the ground up with input from over 200 MSPs to enable rapid action, simple navigation, and fast customer onboarding.

- ▶ True multi-tenancy designed for MSP workflows
- ▶ Global rules and policies
- ▶ Cross-tenant email search
- ▶ Centralized remediation actions across all customers

↳ Try It Without Committing: Monitor Mode for Proof-of-Value Sales Enablement **NEW**

Efficiently demonstrate value by scanning existing mailboxes with no disruption.

↳ Global Email Remediation Across Customers **NEW**

Enables MSPs to remove malicious emails across all client tenants with a single action leveraging API integration.

↳ Simplified Billing Per M365 User **NEW**

Eliminates surprises with 1:1 licensing aligned to real-world usage. Pay only for what you use, scaling with your customer base and monthly fluctuations.

↳ NFR Licenses Available

Support for MSPs to leverage the same product for internal protection.

↳ Stack Consolidation Opportunity

Reduces need for third-party email solutions — all under one platform.

Flexible deployment in minutes, not days

↳ Flexible Deployment: SEG, API, or Both **NEW**

Choose the approach that fits each client environment — perimeter filtering, mailbox-level protection, or combined defense.

↳ Secure Email Gateway (SEG) Compatible with Any Provider

Protects organizations using any email system — including Microsoft 365, Gmail, on-prem, or third-party hosted services — by routing email through Bitdefender's SEG.

↳ API Integration with Microsoft 365 **NEW**

Deploy in minutes with no MX record changes, gaining mailbox-level visibility and post-delivery remediation.

↳ Combined SEG + API Deployment **NEW**

Maximize protection with pre-delivery filtering plus mailbox-level detection and remediation — full coverage across all attack stages.

Protect against the full spectrum of email-based threats

↳ Business Email Compromise (BEC) and Impersonation Protection

Detects impersonation tactics and social engineering attempts that bypass traditional spam filters.

↳ Zero-Day and Advanced Threat Protection **NEW**

Stops known and unknown threats with multi-layered detection, including sandboxing to catch evasive malware.

↳ Insider Threat Protection **NEW**

Stops internal threats and compromised accounts — threats that never pass through the SEG.

↳ Real-Time URL Protection

Scans URLs against threat feeds to block links to phishing or malicious websites before the user clicks.

↳ Warning Banners **NEW**

Adds contextual warnings to suspicious emails, improving end-user awareness without blocking productivity.

↳ Outlook Rule Integration for Allow/Block **NEW**

Users can manage allow/block rules directly in Outlook — no need to log in to a separate portal.

↳ Sender Verification

Enforces SPF, DKIM, and DMARC checks to block spoofing and domain abuse.

↳ Graymail Filtering

Separates non-malicious but unwanted content (e.g., newsletters, marketing emails) to reduce inbox clutter and improve productivity.

↳ Outbound Scanning **NEW**

Stops outbound malicious content, spam, or signs of compromise before it can harm client reputation.

Ready to Simplify Email Security for Your Clients?

Bitdefender Extended Email Security was built from the ground up for MSPs — combining multi-layered protection with simple, flexible management to help you deliver stronger security, reduce overhead, and grow your business.

What MSPs Are Saying

“The ability to manage everything centrally from partner level makes our job so much easier. The detection accuracy is excellent and for the price point, it’s a no-brainer. It saves us time and money every single month.”

CHRIS POTTRELL
MANAGING DIRECTOR
NEBULA IT

“We were immediately impressed by the MSP-centric approach. They were really easy to work with and made us feel looked after from the start. We love how it syncs licenses from 365, simplifying reconciliation and preventing disputes. The precise billing makes a world of difference every month.”

DUNCAN BROWN
OPERATIONS MANAGER
CORTEC IT

“It’s exceptional ability to identify and thwart impersonation emails stands out. It’s intuitive management features for MSP and overall simplicity make them one of our favorite vendors to work with.”

ROB WATSON
CTO
DRESNER GROUP

Why MSPs Choose Bitdefender

- ↳ **MSP-First Design:** Built with input from 200+ MSPs for speed, scalability, and efficiency
- ↳ **Multi-Layered Protection:** SEG + API + insider threat coverage for true perimeter-to-inbox defense
- ↳ **Simplified Operations:** Centralized multi-tenant portal with global rules and cross-tenant remediation
- ↳ **Flexible Licensing:** Usage-based, 1:1 with Microsoft 365 — no surprises, no hidden costs
- ↳ **Stronger Business Outcomes:** Fewer tickets, happier end users, and higher margins for MSPs

Bitdefender is a cybersecurity leader delivering best-in-class threat prevention, detection, and response solutions worldwide. Guardian over millions of consumer, enterprise, and government environments, Bitdefender is one of the industry’s most trusted experts for eliminating threats, protecting privacy, digital identity and data, and enabling cyber resilience. With deep investments in research and development, Bitdefender Labs discovers hundreds of new threats each minute and validates billions of threat queries daily. The company has pioneered breakthrough innovations in antimalware, IoT security, behavioral analytics, and artificial intelligence and its technology is licensed by more than 200 of the world’s most recognized technology brands. Founded in 2001, Bitdefender has customers in 170+ countries with offices around the world.
